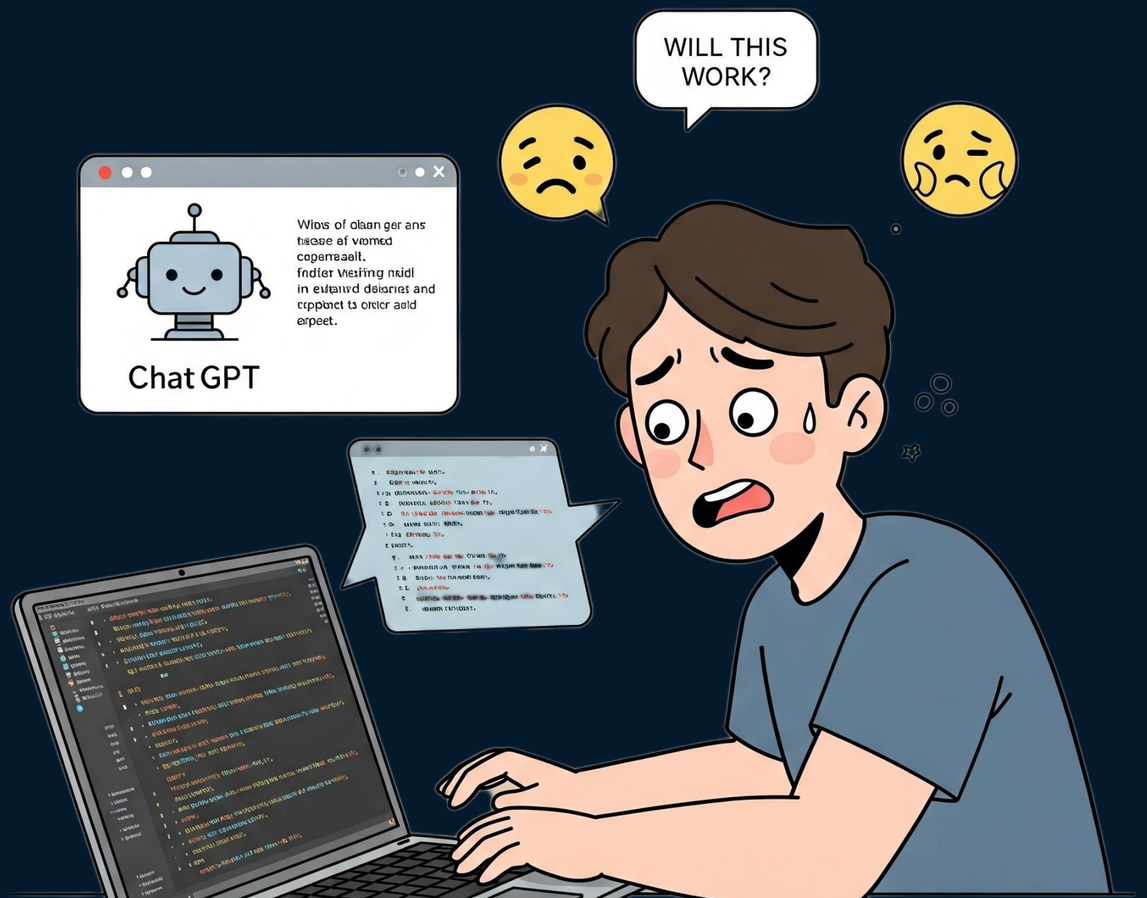
# What is Vibe Coding?



Asking ChatGPT for code…
and just hoping it works —
even if you don’t really know
how or why 🤖🤞🤷.

## It feels fast...

"I got the code."

"It runs."

"I saved time."

## ...until it isn't

🔧 *You can't fix it when it breaks.*

✂️ *You can't adapt it when needs change.*

❓ *You can't explain it to others.*

🧠 *And worst of all — you didn't really learn anything.*

# From Vibe to Understanding

AI can teach you to code — if you ask the right questions.

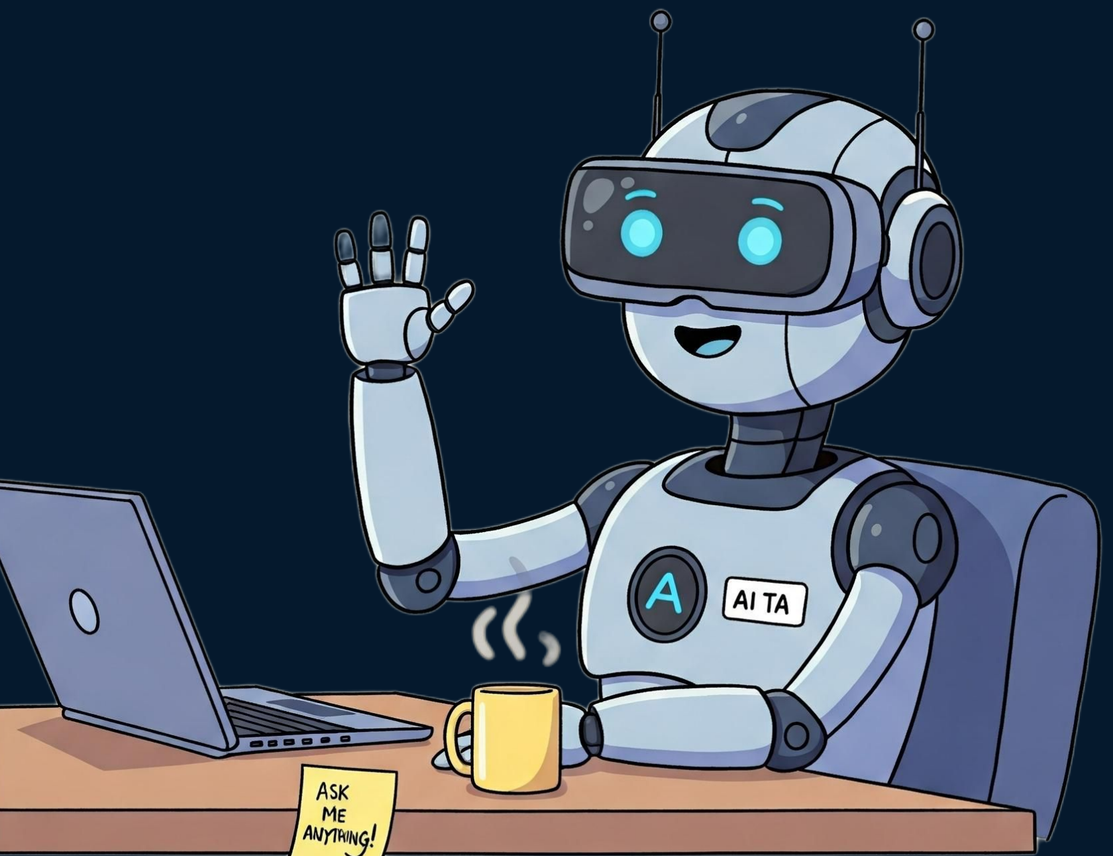
# Our Case Study: The Meeting Overload Dashboard

**Data:** Meeting logs across departments — including number of meetings, day of week, meeting type, average duration, and reschedule rate.

**Primary Goal:** Show how AI can help us learn — not just generate — code, by prompting for explanations, alternatives, and improvements.

**Secondary Goal:** Use ChatGPT to guide us through writing and understanding SQL and Python code to answer: “Which team has the most meetings, and when?

# Meet Your AI TA



Stuck? Unsure? Want more detail?

**Ask the AI TA**

Like ChatGPT, but knows about this session.

# Thank you
