

Organize this folder. Read each file, figure out what it relates to, and sort everything into subfolders by client or category. Rename files with clear, descriptive names. Put anything that isn't client work into a separate Personal or Admin folder. Give me a summary when you're done.

**Good Prompt (Segment 3 - type and run)**

**GOOD**

Research Netflix as a competitor in the streaming services market. Use the template in templates/competitor-template.md to structure your output.

Focus on: their subscription tiers and current pricing, content strategy (originals vs. licensed), any news from the last 90 days, subscriber base and growth trends, and where they are strong and weak relative to other major streamers.

Save the completed profile as a markdown file in the outputs folder named netflix-profile.md.

Cite your sources at the bottom.

**Short Prompt with SKILL.md (Segment 4 - run)**

**SHORT**

Research Netflix and create an updated competitor profile.

**Batch Prompt (Segment 4 - run)**

**BATCH**

Research Disney+ and Apple TV+ using the same process. Save each as a separate file in outputs.
