

Resources —

Automate your Office with Amazon Quick

Thanks for joining the session! Here are a few resources that are particularly relevant:

Session Files:

- [Slides](#)
- [Hands-on synthetic demo dataset \(ZIP file\)](#)

Set-Up Info:

1. Install Amazon Quick: Visit the official [Amazon Quick download page](#) and download the appropriate version for your computer. No AWS account or other subscriptions needed.
2. Download the above dataset: The content is already organized into folders based on the different applications and use cases we will demonstrate.
3. Gmail setup - optional: Attendees who want to follow the email portion can create a new/dummy Gmail account specifically for the workshop. The ZIP contains synthetic sample emails that can be loaded into this account ahead of the session. We recommend using a demo/dummy account so attendees do not need to use their personal or work email.
4. Slack setup - optional: Attendees who want to follow the Slack portion can create a small demo Slack workspace. Synthetic Slack conversations are included in the ZIP.
5. Google Drive - optional: Attendees can upload the supplied sample documents into a separate demo Google Drive folder if they want to follow the document and knowledge-discovery examples.

Happening soon!

AI and data skills aren't optional anymore.

This week, develop the most important skills for free. No coding or technical skills required. All roles welcome.

Follow-along sessions you can run in Excel, upskilling playbooks from global enterprises, and AI agents for daily work. Plus guides, cheat sheets, and a curated curriculum. One registration unlocks everything.
