

Consultants are becoming data-driven with DataCamp

8 of the top 10 Consulting companies use DataCamp to scale their training and ensure they stay at the cutting edge of data science and analysis

BAIN & COMPANY

Deloitte.

Use cases

Business analytics

Client reporting

Data exploration & visualization

"With DataCamp, I'm able to easily brush up on key skills, like data manipulation with pandas, from anywhere in the world. As a consultant who's constantly traveling and managing client deadlines, this flexibility is of utmost importance. The courses and platform experience are great—very straightforward so learning becomes second nature. And I'm able to easily assign relevant courses to my associates to make sure their skills are up to par."
